

ABOUT ME

Frontend developer with 5 years of commercial experience, working in teams ranging from 2 to 20 members, both remotely and on-site. Have 1 year of leading frontend team experience. Built full cycle of development: from gathering product owner requirements to establishing fully automated release process with high test coverage, detailed analytics and CI/CD

I also taught a course on Frontend in the academic department of the company I worked for. Successfully trained many junior developers.

It's very important to me to actively communicate with my team, making decisions that allow us to create a great product.

SKILLS

Frontend: ReactJS, JavaScript and TypeScript with the latest ECMAScript standards, HTML, CSS, Redux, MobX, SCSS, styled-components, Jest, Testing Library, react-router-dom, Axios, GraphQL, FSD pattern

Other: NestJS, NodeJS, PostgreSQL, CI/CD, Nginx, Webpack, Git, npm, yarn

EXPERIENCE

RAIFFEISEN BANK: 05/2023 - PRESENT, 1+ YEARS

- developed microfrontend system based on webpack module federation, which improved the scalability of the project and also allowed the team to work independently of each other
- I created mockups in figma myself to improve UX and meet the customer's needs with their subsequent implementation on the frontend
- add unit tests on Jest and Testing Library to the project with almost full coverage of most important components

Technologies: React.js, TypeScript, MobX, Jest, Microfrontend with Webpack Module Federation, Git

GARPIX: 10/2020 - 05/2023, 2.8 YEARS

- developed ui kit based on material ui and implements it to the project that decrease feature development time and make it easier for all team members
- add precommit hooks to the project that runs eslint, that decrease count of incidents on test and production stands
- developed a complex system with data serialization and output to tables, as well as further parsing into Excel, which greatly improved the work of operators with the service
- developed full stack app with frontend on React and Backend For Frontend on NestJS with DB on PostgreSQL

Technologies: React.js, JavaScript, TypeScript, SCSS, Redux, MobX, styled-components, Jest, Webpack, GraphQL, NestJS, PostgreSQL, Git

NIKE: 11/2019 - 10/2020, 1 YEAR

- redevelop project from legacy code to react that increase page speed
- developed a basic ReactJS kit for creating advertising landing pages that needed to be done frequently
- increased the Google PageSpeed Insight rate to 98 % by introducing new image formats and compression, as well as the correct use of HTML tags

Technologies: React.js, JavaScript, Cascading Style Sheets (CSS)

EDUCATION

Electrotechnical University "LETI", ST. PETERSBURG – BACHELOR, 2018 - 2022

Information and computer science

HARVARD UNIVERSITY – online course 2019

Computer Science 50 online course
